- pH-neutral, water-based

RV-16

STAINLESS STEEL PROTECTOR

- Conserves stainless steel better and longer
- Restores lustre in one treatment
- Slows down attachment of dirt

RV-17

Surface renovation products

For the most modern surface materials

Renovio products are ideal to be used on highrise buildings, office buildings and industrial buildings. Cleaning companies are often experienced with facade cleaning, but there is a lack of knowledge when it comes to cleaning or renovation of surfaces like anodised or powdercoated aluminium, stainless steel, polyplast and glass. The surfaces need experience and knowledge, which are offered with the Renovio product range.

Excellent performance

Using the Renovio products enables you to recover and protect the original look of buildings, ships and other surfaces in the right way. All Renovio products work fast and effectively, what keeps you ahead of your competition.

GLASS PRECLEANER

- Thoroughly cleans glass in one treatment
- Also removes scale, cement residue, etc.
- Pre-cleaner for Glass Protector (RV-05)

RV-01

GLASS RENOVATOR
