### Coded RevoDisks for easy and right choice of disk.

### Advanced formula polishing compound for excellent result.

## Glass renovation and Scratch removal

RevoGlas, part of Gratch International, offers a full line of systems and products for treatment of glass to remove scratches, acid graffiti and other damages from all types of glass, like floatglass, tempered glass and even fire resistant glass.

RevoGlas is a unique solution for glass renovation without leaving trace marks or distortion like wavy glass or lenses. The systems are designed to handle almost all types of glass damage and provides the operator an effective way to quickly restore glass.

The systems feature high quality and reliable components. Combined with our uniquely designed RevoDisks, the patented backing disks and our advanced formula RevoGlas Polishing Compound, the RevoGlas process offers speed and succes in repairing damaged glass.

## The systems

The RevoGlas system is available as a Pro version and a Lite version. The Pro system contains all available disk-sizes and comes in a high-grade system case, so all materials are well protected on location as well. The Lite version of the system contains the 5" and 6" sizes and is delivered in a storage case. Apart from these complete systems, we can supply you with some smaller startkits; Starter Kit en Starter Kit XL.

### The Pro system:

- High-grade Fieldcase
- Powerful premium grinder
- 4 high quality backing disks
- 3 RevoFelt polishing pads (3" 5" 6")
- 100 RevoDisks (3" 5" 6" 8")
- Rasp file (polishing felt pad)
- IR temperature gun
- Wire brush
- RevoGlas Polishing compound
- RevoGlas Finishing Spray
- Dust mask
- Instruction manual

### The Lite system:

- Strong storage case
- Powerful premium grinder
- 2 high quality backing disks
- 2 RevoFelt polishing pads (5" and 6")
- 50 RevoDisks (5" and 6")
- Rasp file (polishing felt pad)
- IR temperature gun
- Wire brush
- RevoGlas Polishing compound
- RevoGlas Finishing Spray
- Dust mask
- Instruction manual

## RevoDisks

The unique RevoDisks are the base for a good result in glass renovation and are available in four different sizes (3" 5" 6" 8") and five grinding ranges to match every type of scratch or damage. It is not necessary to go through to all individual steps, so time is saved.

The revolutionary design and the construction are proprietary to the RevoGlas RevoDisks. The RevoDisks are built with a base-material that keeps sharp for long time. The RevoDisks also employ a special cushioned design that prevents leaving trace marks, swirls, lenses or distortion even on deep damages.

The disks are coded for quick identification and easy of use.
